DRIVING ENERGY TRANSITION, SECURITY AND DECARBONISATION

DRIVING ENERGY TRANSITION, SECURITY AND DECARBONISATION

Held under the patronage and attendance of His Excellency Abdel Fattah El Sisi, President of the Arab Republic of Egypt, and supported by the Ministry of Petroleum and Mineral Resources, the Egypt Energy Show took place in Cairo from 19 - 21 February, bringing together the ambitions, actions, technology and investment needed to advance the energy transition, and showcase Egypt's progress as the energy hub of the region, representing a unifying voice for Africa's energies of the future.

Held under the theme 'Driving energy transition, security and decarbonisation', EGPES 2024 was uniquely positioned as the platform for energy and related industries to demonstrate their commitment to lowering emissions while supporting industry growth and economic progress.

The Egypt Energy Show continues to be at the heart of the dynamic, fast changing energy conversation, having welcomed an unprecedented 43,600+ attendees, 300+ global speakers - including ministers, global CEOs, policymakers, innovators and future leaders, as well as 450+ companies from across the energy value chain to meet, connect and explore action-oriented roadmaps for development and shared progress.

OPENING CEREMONY INAUGURATED BY HE ABDEL FATTAH EL SISI
PRESIDENT OF THE ARAB REPUBLIC OF EGYPT

OPENING CEREMONY INAUGURATED BY HE ABDEL FATTAH EL SISI, PRESIDENT OF
THE ARAB REPUBLIC OF EGYPT; MOSTAFA KAMAL MADBOULY, PRIME MINISTER
OF THE ARAB REPUBLIC OF EGYPT; AND HE TAREK EL MOLLA, MINISTER OF
PETROLEUM AND MINERAL RESOURCES, ARAB REPUBLIC OF EGYPT

PARTICIPATION FROM MINISTERS, SECRETARY GENERALS AND GLOBAL CEOS

HIS EXCELLENCY AND VIP GLOBAL EXHIBITION TOUR

OPENING CEREMONY

During his keynote address at the EGPES 2024 Opening Ceremony, HE Tarek El Molla, Minister of Petroleum and Mineral Resources, Arab Republic of Egypt called on the industry to remain steadfast in their energy commitments for the region and beyond.

Addressing an audience of more than 1,500+ ministers, policymakers, CEOs and decision makers from across the global energy industry, Ditte Juul Jørgensen, Director General for Energy, European Commission stressed that building from COP 27 and shared commitments from COP28, we have 'clear outcomes to putting energy at the centre of the transition as a necessary component of addressing climate change and building to triple renewables, double energy efficiency and accelerate the energy transition'.

HE Tarek El Molla
Minister of Petroleum and Mineral Resources
Arab Republic of Egypt

AN ASSEMBLY FOR INTERNATIONAL PARTNERSHIPS

43,600+ ENERGY STAKEHOLDERS 100+ COUNTRIES

EGYPES 2024 saw increased participation from 100+ countries, featuring a powerhouse line-up of 26+ NOCs, IOCs and IECs, 10+ Energy Ministers, and 20+ Global CEOs and Energy Presidents. With 300+ thought leaders and speakers, alongside hundreds of energy companies, EGYPES 2024 was at the nexus of innovation and collaboration.

GLOBAL COUNTRY PAVILIONS

VISIONARIES, LEADERS, INFLUENCERS AND DECISION MAKERS FROM AROUND THE WORLD

ATTENDEES BY SENIORITY

We believe in the important role that modern technology will have to play in the future. Energy transition and emission reduction must be accompanied by ensuring energy accessibility and affordability for all.

Guangzhe Chen
Vice President for Infrastructure
The World Bank

LEADING NOCS, IOCS AND IECS PARTICIPATED AT EGPES 2024

EGYPES attracted prominent global oil, gas and energy companies to showcase their latest technologies and solutions in accelerating the energy transition. Leading NOCs, IOCs and IECS participating in 2024 included:

9

NATIONAL OIL COMPANIES

17

INTERNATIONAL OIL COMPANIES & INTERNATIONAL ENERGY COMPANIES

17

INTERNATIONAL TECHNOLOGY & SERVICE PROVIDERS, ENGINEERING, PROCUREMENT & CONSTRUCTION COMPANIES

“

EGYPES is an important date on the calendar for Baker Hughes, because it recognises the African continent as well as the developing countries that are increasing their energy demand.

LORENZO SIMONELLI
Chairman and CEO
Baker Hughes

EXHIBITION OVERVIEW

The EGPES 2024 Exhibition featured over 450+ companies from across the world, representing the entire energy ecosystem in Cairo, showcasing the latest innovations that are defining the energies of the future. Within the EGPES exhibition halls, the event hosted the all-new Future Energy Zone & Theatre to spotlight energy transition blueprints for regional roadmaps on the road to achieving a net-zero future, expanding upon the shared prerogative expressed among the EGPES community to transition and address sustainable, responsible solutions for the future.

An immersive experience to collectively pave the way towards achieving ambitious decarbonisation goals, the global exhibition featured international best practice, to enable the industry to strengthen existing partnerships and explore new avenues for collaboration.

EGYPES
FUTURE ENERGY
ZONE & THEATRE

EGYPES
START-UP
ZONE

HEADLINE SPONSOR

An immersive experience, the EGYPTES Future Energy Zone & Theatre served as a pivotal catalyst in collectively forging the path towards ambitious decarbonisation goals, shaping a sustainable future on the road to achieving net-zero emissions.

Welcoming companies looking to advance and collaborate on the journey towards net-zero emissions, the EGYPTES Future Energy Zone & Theatre amplifies the collective commitment within the EGYPTES community to transition towards sustainable solutions. This dynamic platform not only addresses but expands upon the shared prerogative for sustainable, responsible solutions for the future.

At EGYPTES 2024, the comprehensive showcase left no aspect of the energy transition unexplored, heralding a paradigm shift for exhibitors and visitors alike, promising transformative insights and opportunities.

FUTURE ENERGY ZONE

View the EGYPTES
Future Energy Zone
Highlights Video

In addition to advancing large-scale green hydrogen projects, Egypt has great opportunities for energy transition, benefiting from a highly qualified workforce, which will aid in achieving this transition.

Robert Valk
CEO and Founder
Reenergy Group Partners

START-UP ZONE SPONSOR

EGYPTES 2024 unveiled an unparalleled platform, the Start-Up Zone, spotlighting emerging innovators shaping the energy landscape.

Recognising the burgeoning potential of New energies, EGYPTES introduced four groundbreaking features and conferences. The Future Energy Zone & Theatre became a hub for industry titans to showcase cutting-edge technologies driving the net-zero agenda.

The Start-Up Zone provided a spotlight for emerging innovators, amplifying their role in shaping the energy landscape. The CLIMATECH Challenge elevated pioneering startups, offering a global stage to pitch transformative solutions.

We are absolutely thrilled to be showcasing our innovation at the Start-up zone and are honoured to have won the CLIMATECH Challenge Award amidst an exceptional line-up of start-ups who are extremely dedicated to mitigating carbon emissions, and we are proud to stand among them.

Huseyin Ciloglu
Vice President and COO
PIKARE

VISITOR OVERVIEW

EGPES 2024 welcomed more than 43,600 attendees from 101 countries, delivering a global destination for energy professionals to engage in important dialogue, gain new perspectives and exchange best practice to address the energy trilemma and connect on evolving supply and demand strategies for growth.

STRATEGIC
CONFERENCE

As the industry emerges as the catalyst for change, championing initiatives and ensuring a just and secure energy supply for all, EGPES 2024 played an active role in enabling the future of the global energy ecosystem.

The oil, gas and energy industry remain robust despite the pace of change dictated by increasing geopolitical tensions and colliding crises affecting all countries globally. Markets continue to shift, and partnerships continue to evolve as climate mandates continue to dominate government, policy, and industry.

Affordable and secure energy supplies today demand continued access to funding for fossil fuels, that are climate conscious, low-carbon and transformative. However, these investments must not overshadow the industry's continued focus upon advances in clean, green and renewable energies and pioneering technologies.

As the energy transition advances, as commitments become actions, the industry continues its journey as the catalyst of change, leading the transition, championing decarbonisation initiatives and delivering a just and secure energy supply for all.

Through a series of keynote addresses, interactive panel discussions and interviews, the EGPES 2024 Strategic Conference provides you with the thought leadership on future energy strategies and a deep dive on the industry issues at the top of government and organisational agendas.

We do not witness any decrease in energy demand. We are now in Cairo, realising that these expansions prove that the demand is still strong and will remain so. But we need to focus more on the long-term goals and the necessity of continuous investments in oil and gas production.

HE Haitham Al Ghais
Secretary General
Organization of the Petroleum Exporting Countries (OPEC)

We, collectively in our close partnership with Egypt, working with the energy sector, and working as a European Union over these last few years have shown that we are capable if we work together to build the right partnerships to make change swiftly and adapt to the changing circumstances. In that context, we see Egypt as a key strategic partner, aiming to further strengthen our partnership including around investments. I think the energy transition is both a security agenda, a climate agenda and is also a just transition and a competitiveness agenda and all of that requires investments.

We need to work more closely together bringing in the private sector to make these necessary investments that will also be part of the European Union and agenda partnership in the coming years.

ADDRESSING 19 TECHNICAL CATEGORIES

Engineered by technical experts, exclusively for industry specialists, the Technical Conference played a central position within the catering to engineers, technical experts, and digital champions alike.

The EGPES Technical Conference provided an ultimate platform for energy sector engineers to push the boundaries of excellence, to navigate the ever-evolving realms of cutting-edge innovative technologies, and to showcase project expertise and technical insights.

Attendees delved deep into the latest advancements, best practices, and innovative solutions that were shaping the energy landscape. Whether seasoned energy professionals looking to reach new heights or young talents just starting their energy journey, the EGPES Technical Conference programme was their launchpad for endless possibilities, invaluable knowledge gathering, and career progression.

EGYPES SUSTAINABILITY IN ENERGY CONFERENCE

LEAD SPONSOR

wintershall dea

Following the backdrop of pressing environmental concerns and the critical need to reduce greenhouse gas emissions, the conference brought together industry pioneers to explore the latest clean energy advancements and strategies required to accelerate net-zero targets by 2050.

When it comes to combatting climate change and advancing decarbonisation, global economies are rapidly moving from ambition to action. With growing concerns about the environmental impacts of carbon emissions, governments, key industrial sectors, and society at large have recognised the urgent need to transition from fossil fuels towards cleaner, more sustainable energy sources.

As a result, the global energy landscape is undergoing a paradigm shift, from fossil fuels towards renewable energies. This has led to a surge in global decarbonisation efforts in driving a remarkable wave of innovation and technologies across the energy value and supply chains. From the evolution of natural gas to the emerging potential of green hydrogen and green ammonia, a myriad of clean energy solutions is gaining momentum. These developments are, improving energy efficiency, promoting circular economy practices and increasing the adoption of renewables in the energy mix.

Governments, industry leaders, innovators, and communities must unite in a shared mission for a sustainable future, leaving no one behind.

EGYPES FINANCE & INVESTMENT IN ENERGY CONFERENCE

The conference gathered energy leaders, sustainable finance and climate experts to assess the economic uncertainties facing global economies in leveraging financial mechanisms and capital market tools to deliver future energy systems.

Global energy markets are having to learn to adapt in today's ever-changing industry landscape, which is striving for cleaner energy, facing geopolitical constraints, and unprecedented inflation rates.

The increased urgency of the climate crisis has accelerated calls to action for the energy sector to accelerate decarbonisation activities over the next decade and achieve meaningful targets by 2030. With the global energy mix shifting from fossil fuel-based systems of energy production and consumption to renewable energy sources, an estimated \$200 trillion in global investments needed to reach net-zero emissions by 2050.

Despite renewable energies gaining momentum, they still only account for approximately 6% of the world's energy consumption. Global energy demand is anticipated to rise through 2050 with oil remaining the largest energy source, investment in oil and gas projects and infrastructure will therefore be vital in ensuring affordable and reliable energy supply throughout this transitional period. Furthermore, geopolitical tensions continue to underline the importance of a more gradual transition, both for energy security and environmental reasons.

As we navigate the transition towards a more sustainable future, collaboration between governments, businesses, and communities will be key.

EGYPES
**AFRICAN
DIALOGUE
CONFERENCE**

The inaugural conference brought together key African stakeholders including top government officials, financial institutions, economists and energy thought leaders to discuss the most pressing challenges related to policies, regulations and natural gas infrastructure development.

Africa's population is expected to double by 2050, as a result the continent's energy demand is expected to increase tremendously in the next two decades. Despite possessing 8% of the world's proven natural gas reserves, more than 700 million Africans lack access to energy and clean cooking fuels.

In accordance with the Paris Agreement, the transition away from fossil fuels has been at the centre of the global climate conversation. Despite contributing the least to global warming and emitting the lowest greenhouse gases, Africa is the most vulnerable to climate change.

Given that African economies are heavily dependent on oil and gas export revenues, fossil fuels will continue to maintain a prominent role in the region's energy mix. While African nations have demonstrated ambition in playing a crucial role in global efforts to combat climate change, Africa must take a pragmatic approach that assures a gradual shift from fossil fuels to clean energy sources.

The quest for energy security is the driving force for today's rush for energy transition. Individually, no one African country can successfully surmount the imminent energy challenges posed to it by energy transition. However, working collectively will help us have all the details to surmount all the challenges.

**EQUALITY
IN ENERGY**
CONFERENCE

LEAD SPONSOR

wintershall dea

The conference brought together global industry experts, including organisational change management and inclusion and sustainability leaders to drive the discussion on how talent strategy is becoming an existential priority in creating a people-centred energy future.

As the energy transition accelerates, fuelled by groundbreaking clean energy technologies, the global spotlight on talent strategy intensifies. This has increased pressure in the industry to recruit, retain, and upskill existing talent to bridge skill gaps, exacerbated by retiring professionals leaving the sector, digital transformation creating new roles, and talent drain to technology sectors.

Navigating the energy transition and attaining net zero targets by 2050 will be a generational challenge, with STEM millennial and Gen Z graduates of today, being the energy leaders of tomorrow. With this in mind, the sector is actively redefining itself to be an attractive career proposition for the next generation of talent. From creating flexible working environments which offer employees better work life balance to fostering a culture of purpose that aligns with their values.

Despite evidence clearly demonstrating that a diverse and inclusive workforce fosters profit and innovation, yet only a tiny proportion of women continue to enter the energy industry in spite of a large cohort of STEM graduates. Creating a diverse and inclusive workforce remains a strategic necessity to enable a low carbon future.

The gender equality session arrives at a time where Egyptian women have shown that they are strong enough to enjoy human rights in an unprecedented way. I'm proud to spotlight the remarkable success stories of women in the petroleum and energy sector, where they represent 22% of the global workforce in this vital, fiercely competitive field.

A comprehensive showcase at EGPES 2024, left no aspect of energy transition unexplored and promising to be a game-changer for exhibitors and visitors alike.

EGYPES 2024 CLIMATECH Challenge served as a global platform for start-ups to pitch their technological solutions and business models in front of a panel of influential judges, spotlighting pioneering start-ups with cutting-edge solutions to expedite the energy transition and amplifying the role of undiscovered energy innovators in advancing global net-zero targets.

The CLIMATECH Challenge encompassed a rich programme of keynote speeches, motivational talks and panel discussions – gathered global energy industry visionaries, investors, change-makers, and emerging start-ups to showcase the critical innovations and groundbreaking climate technologies that are accelerating decarbonisation and supporting the transition to clean energy sources.

SPECIALISED EXPERIENCES

EGYPES 2024 successfully hosted a global exhibition with Special Features highlighting future energy solutions, reflecting the urgency of navigating the energy transition. The exclusive EGYGES Energy Club provided a private haven for industry elites to engage in strategic discussions with international leaders, fostering invaluable connections. Additionally, the EGYGES Young Professionals zone was created to foster and equip emerging talents to address generational challenge navigating the energy transition and reaching net-zero and nurture them with expertise to solve exceedingly complex challenges to transform young professionals of today into industry leaders of tomorrow.

A dynamic platform for aspiring energy enthusiasts, offering a powerful stage to engage, learn, and lead the charge in shaping a sustainable, energy efficient and transformative future.

The Programme extended its impact by providing an on-site and off-site learning platform that actively engages high school and university students within the framework of STEM Education, with a sharp focus on Science, Technology, Engineering, and Mathematics.

This strategic approach of the EGPES Young Professional Programmes ignited passion within these young minds, motivating and preparing them to pursue rewarding careers in the energy industry.

YOUTH TALKS

In alignment with EGPES' overarching theme, this year's awards ceremonies actively support the industry's unification and acceleration of energy transition initiatives, along with groundbreaking solutions to decarbonise, ensuring a sustainable and secure future for the entire global community.

With 8 curated categories, the EGPES Energy Awards shine the spotlight on resolutions to challenges faced by the energy industry while championing the cause of global energy transition. These categories mirror the urgent need for universal access to cleaner, more secure energy and tangible, credible solutions that usher in impactful change and transformative progress for the betterment of humanity.

As nominees and winners of the EGPES Energy Awards, pioneering and influential leaders making headlines and catalysing important developments in the energy sector are recognised for their invaluable contributions on the road to achieving net zero.

In response to growing global emphasis on the industry's dedication to decarbonisation and energy transition, the EGPES Sustainability in Energy Awards tackle critical issues and highlight the increasing significance of Environmental, Social, and Governance (ESG), Corporate Social Responsibility (CSR), and Health, Safety, and Environment (HSE) within the industry. EGPES Energy Awards categories addressing sustainability in energy shine the spotlight on exceptional initiatives and ground-breaking efforts to propel the industry forward towards achieving net-zero agendas

The EGPES Energy Awards welcomes all, as a celebration stage for energy leaders and influencers towards a sustainable, net-zero future. We're proud to celebrate pioneers excellence in the industry, and the initiatives driving us towards tomorrow's progress, in a responsible, resilient future.

SOCIAL & DIGITAL OUTREACH

Under a strategic countdown communications campaign, EGPES promoted every experience to the energy community.

EGPES 2024 implemented a comprehensive communication strategy, spanning the period leading up to, during, and after the event, aimed at ensuring a unified message and maximising engagement across diverse audiences. By closely collaborating with exhibitors, sponsors, partners, speakers, and energy experts, our communication efforts effectively conveyed EGPES's core messages, critical perspectives, and event outcomes to a global audience.

Digitisation is crucial in determining energy needs, consumption patterns, and efficiency. Safe and sustainable power transmission is paramount for companies, as they aim to reduce consumption and explore affordable alternatives. United Energy is investing in hydrogen and other alternative energy sources, supporting nations in the Middle East, including Egypt.
